**SPEAK2 RANGE**

The next generation of professional speakerphones, engineered for hybrid working

Technology for life's new rhythm

**OUTSTANDING AUDIO QUALITY**

Forget everything you think you know about portable speakerphones. We're tearing up the rule book with the new Speak2 Range, featuring super-wideband audio\*, and advanced full-range speakers. This cutting-edge tech puts you front and center, unscrambling all of the possible frequencies in your voice's natural range. **It's a dramatically more powerful audio experience.**

**ADVANCED FULL DUPLEX AUDIO**

Some speakerphones don't allow both sides to speak and be heard at the same time, but we think conversations are better when they flow naturally. Speak2 is our first range of speakerphones to be specifically engineered for perfect full duplex audio, going way beyond standard speakerphone performance. **So your conversations can flow freely in both directions, just like they would in person.**

**UPGRADED MICROPHONE TECHNOLOGY**

The Speak2 Range features four of the most state-of-the-art beamforming microphones, more than ever in a Jabra speakerphone, and the very latest digital signal processing algorithms. This allows them to effortlessly harness every change in voice tone, to pick up every nuance (because it's not what you say, it's how you say it). Innovative noise reduction technology keeps background distractions at bay. **The result is an outstanding audio performance that's truly unmatched.**

**UNIQUE MICROPHONE QUALITY INDICATOR**

See at a glance how well you're being heard at all times, wherever you are in the room, with the only speakerphone on the market to feature a custom-designed Microphone Quality Indicator.\* Tap-activated via the Sound+ and Jabra Direct apps, this intuitive 360-degree light ring gives you a visual indication of when you're coming across loud and clear, and when you need to huddle in a little closer. **It's like having a personal voice coach in every meeting.\*\***

**ALL-NEW VOICE LEVEL NORMALIZATION**

We know how vital it is that everyone can be heard equally, so the new Speak2 Range is the first to be engineered with our latest cutting-edge Voice Level Normalization technology. That means you'll be heard whether you speak with quiet confidence or enthusiastic energy. **Now you can be yourself and speak in the way that's most natural for you.**

**PREMIUM PORTABLE DESIGN**

The iconic, much-loved 'puck' shape of the original Speak Series gets a serious makeover with Speak2. It's modern and minimal, with brushed aluminum detailing\* and premium custom-designed speaker fabric, engineered to deliver the most optimal audio experience. It's small and durable enough to throw into your bag, too. **Looks sleeker than ever. Performs better than ever.**

**ADDED DURABILITY**

We've made sure the Speak2 Range is built to handle anything a busy hybrid working day throws at it – from messy kitchens to deep work bags – with all-new IP64\*\*\*-rated protection from dust and water. **So you can use it anywhere, without worrying.**

**EASE OF USE & BATTERY LIFE**

Just plug-and-play and you're off faster than you can say "you're on mute". Go wireless with up to 32 hours of battery, and make setup even more of a snap with Microsoft Swift Pair and Google Fast Pair. **Your Speak2 is ready for anything.**

**FUTURE-PROOF**

Speak2 is the first range of speakerphones in its category to have both USB C and USB A connectors on the same cable, so you won't need to tear the office apart looking for an adapter, plus it'll work now, and when you get a new computer. And since we're givers, we'll also keep you ahead of the game with regular firmware updates via Jabra Direct and Xpress software. You can even customize your settings with the Sound+app.\* **Just think of it as your flexible friend.**

**SUSTAINABILITY**

To help take care of our planet, we consider sustainability carefully at every stage of product development. That's why the casing of Speak2 55 & 40 is made with over 50% sustainable materials\*\*\*\* and both devices feature a number of built-in parts that can be easily repaired or replaced. **Better sustainability = longer speaker life = great calls for you and your team for years to come.**

\*Speak2 75 only, Super-wideband audio experience requires UC client support, and device support

\*\*Initial activation is required via the Jabra Sound+ or Jabra Direct apps

\*\*\*Avoid exposing the USB cable or adapter plug to moisture or liquids and never charge or power up if the USB cable or adapter plug is wet or moist

\*\*\*\*Sustainable materials include post-consumer recycled, post-industrial recycled or bio-based materials

Features Speak2 75

## CERTIFICATIONS

The Speak2 Range is certified for all leading virtual meeting platforms, and optimizes the whole experience, for professional call quality every time. So whether you prefer to jump on Microsoft Teams, Google Meet or Zoom, you can rely on seamless plug-and-play connectivity and reliably brilliant meetings right from the get-go. **Now you can get together from anywhere.**
